INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 11245/53476	FOR FURTHER ACTION	See item 4 below
International application No. PCT/US2004/043482	International filing date (day/month/year) 20 December 2004 (20.12.2004)	Priority date (day/month/year) 19 December 2003 (19.12.2003)
International Patent Classification (8th See relevant information in Form P	edition unless older edition indicated) CCT/ISA/237	
Applicant IMCLONE SYSTEMS INCORPOR	ATED	

1.	This international preliminary international Searching Author	report on patentability (Chapter I) is issued by the International Bureau on behalf of the ity under Rule 44 bis.1(a).
2.	This REPORT consists of a tot	al of 5 sheets, including this cover sheet.
	In the attached sheets, any refe to the international preliminary	rence to the written opinion of the International Searching Authority should be read as a reference report on patentability (Chapter I) instead.
3.	This report contains indication	s relating to the following items:
	Box No. I	Basis of the report
	Вох №. П	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
•	Box No. IV	Lack of unity of invention
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
	Box No. VII	Certain defects in the international application
	Box No. VIII	Certain observations on the international application
4.	The International Bureau will onot, except where the applicant date (Rule 44bis .2).	communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority
		Date of issuance of this report

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US04/43482

Box No. I Basis of this opinion				
1. With regard to the language, this opinion has been established on the basis of:				
the international application in the language in which it was filed				
a translation of the international application into, which is the language of a translation furnished for the purposes of				
international search (Rules 12.3(a) and 23.1(b)).				
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:				
a. type of material				
a sequence listing				
table(s) related to the sequence listing				
b. format of material				
on paper				
in electronic form				
c. time of filing/furnishing				
contained in the international application as filed.				
filed together with the international application in electronic form.				
furnished subsequently to this Authority for the purposes of search.				
3. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.				
4. Additional comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US04/43482

Box No. V	Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial
	applicability; citations and explanations supporting such statement

1. Statement		
Novelty (N)	Claims 13, 14, 22-24, 26	YES
	Claims 1-9, 11, 12, 15-21, 25	NO
Inventive step (IS)	Claims NONE	YES
	Claims 1-26	NO
Industrial applicability (IA)	Claims 1-26	YES
••	Claims NONE	NO

2. Citations and explanations:

Claims 1-9, 11, 12, 15-19, and 25 lack novelty under PCT Article 33(2) as being anticipated by US 20030203844 (Delfani et al) 30 October 2003. The reference teaches methods of treatment of CNS disorders using reagents that modulate the proliferation, migration, differentiation and survival of central nervous system cells (see Abstract). The reagents taught include FGF2 [0338], VEGF (whole document), and neural stem cells propagated ex vivo [0035]. The effect of modulating the migration of neural progenitor cells recited in the instant claims merely reflects a newly discovered inherent property; this outcome would occur whenever the methods taught in the prior art are practiced.

Claims 20, 21, and 25 lack novelty under PCT Article 33(2) as being anticipated by US Patent 6261585, 17 July 2001. The reference teaches incorporation in of VEGF and bFGF into biocompatible polymers for in vivo implantation (column 3, lines 35-50), thereby anticipating claims 20, 21, and 25.

Claim 10 lacks an inventive step under PCT Article 33(3) as being obvious over US 20030203844. If one aims to use undifferentiated stem cells, it would be obvious to pick cells that do not express known markers of differentiation.

Claims 13, 14, 22-24, and 26 lack an inventive step under PCT Article 33(3) as being obvious over US 20030203844 in view of US Patent 626158. As noted, US 20030203844 teaches treatments using VEGF, FGF2, and neural stem cells and US Patent 6261585 teaches the use of these elements in biocompatible matrices. The instant claims recite the obvious combination of these elements.

Claims 1-26 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
